## SERVICENOW FSM | OPERATING MODEL & DIGITAL TRANSFORMATION

London, UK | +44 7380 729840 | Choudhary.ume3001@gmail.com | linkedin.com/in/ume-choudhary | SC Clearance Eligible

### PROFESSIONAL PROFILE

Field Service Management and operational service transformation consultant with 8+ years across enterprise service operations, HR, Facilities, workplace services, legal, compliance and digital transformation, including Capgemini Invent and Amazon. Experienced across the full transformation lifecycle from diagnostics, discovery and business-case development through current-state assessment, target operating model and future-state design, functional requirements, implementation, testing, adoption and continuous improvement. Hands-on ServiceNow FSM and enterprise service-management experience supporting work order management, technician assignment, scheduling and dispatch, field workforce enablement, service requests, asset/service management, maintenance workflows, inventory/parts processes, SLAs, escalation models and service analytics. Delivered 10+ end-to-end transformations across EMEA, North America, Latin America and APAC, including a 70+ country global programme; trusted by senior stakeholders, Product Owners and cross-functional delivery teams.

### FIELD SERVICE MANAGEMENT & TRANSFORMATION EXPERTISE

**Field Service Operations:** Work order management | Technician assignment | Scheduling & dispatch | Field/mobile workforce enablement | Service requests | Maintenance workflows | Asset/service management | Parts & inventory | SLAs | Escalations | Service analytics | Operational performance

**FSM Transformation:** Diagnostics | Current-state assessment | Business case/value case | Target operating model | Future-state blueprint | Functional design | Fit-gap assessment | User stories | Acceptance criteria | Process optimisation | Implementation roadmaps

**Platforms:** ServiceNow FSM - hands-on | ServiceNow ITSM, CSM, HRSD & Employee Center | Salesforce Field Service, Microsoft Dynamics 365 Field Service, IFS FSM/PSO, Oracle Field Service and ServiceMax - platform familiarity

**Delivery & Leadership:** Agile delivery | UAT | Defect triage | Go-live readiness | Training | Adoption | Hypercare | RAID governance | Senior stakeholder management | Executive communication | Team/workstream leadership

### QUANTIFIED BUSINESS & SERVICE IMPACT

- Improved service case resolution by 35% and onboarding efficiency by 40% through redesign of service workflows, journeys, approvals, SLAs and governance.
- Delivered up to 40% process improvement and 200+ hours of annual productivity savings through workflow automation across HR, Legal, IT, Finance and Audit operations.
- Converted 20+ discovery/design workshops into validated operational requirements, prioritised backlogs, future-state processes, solution options and transformation roadmaps.
- Delivered 10+ end-to-end enterprise transformations across EMEA, North America, Latin America and APAC, including programmes spanning 70+ countries.
- Helped secure two competitive transformation bids, including an approximately £900k+ ServiceNow HRSD/CSM deployment, through service-design narratives, value cases and executive materials.

### PROFESSIONAL EXPERIENCE

#### Senior Consultant - Capgemini Invent | Jan 2026 - Present

- Lead end-to-end enterprise service transformation within a 5+ workstream global programme spanning 70+ countries and 10+ integrations, from diagnostics/discovery through future-state design, implementation, testing, readiness and adoption.
- Partner with senior stakeholders, Product Owners and operational teams to diagnose service pain points, define business outcomes and translate needs into scalable service and technology priorities.
- Apply FSM and enterprise service-management principles across work management, intake, assignment, routing, scheduling, operational workflows, SLAs, escalations, asset/service processes and service performance reporting.
- Facilitate discovery and design workshops, converting requirements into process flows, functional requirements, user stories, acceptance criteria, fit-gap considerations and implementation roadmaps.
- Support target operating model and future-state service design covering roles, responsibilities, governance, hand-offs, service levels, controls and technology-enabled ways of working.
- Own cross-workstream RAID governance and coordinate integration dependencies/go-live readiness; manage and provide functional direction to a 5+ member onshore/offshore team through design, build, testing, validation and deployment.
- Advise senior stakeholders and C-suite executives on service-management capabilities, operating-model improvements, automation opportunities and business value.

#### Solution Delivery Lead - CT Global - B2B SaaS & Client Services | Aug 2023 - Dec 2025

- Led enterprise service and workflow transformation across HR, Legal, IT, Audit and Finance, coordinating 10+ client SMEs, delivery resources and third parties across discovery, design, implementation, testing, training and adoption.
- Ran 20+ cross-functional discovery/design workshops, diagnosing current-state operational pain points and defining scalable future-state service processes, functional designs, user stories, acceptance criteria, prioritised backlogs and roadmaps.
- Designed service-management processes covering work/request intake, assignment, routing, approvals, SLAs, escalation paths, service ownership, operational controls and performance reporting.
- Established structured service operating models from a standing start, defining scope, intake channels, ownership, service levels, governance, escalation mechanisms and reporting; improved case resolution by 35% and onboarding efficiency by 40%.
- Used KPI, adoption, operational performance and risk reporting to support evidence-led decisions and continuous improvement; supported business readiness with SOPs, process maps, training, knowledge content and solution walkthroughs.

## **Solution Delivery Consultant - Amazon | Jun 2021 - Jul 2023**

- Delivered service-management and operational workflow transformation across HR, Facilities, workplace operations, Legal, Compliance and IT in a complex, high-volume environment.
- Worked across workplace and Facilities service operations, supporting structured service delivery, request/work intake, assignment, routing, approvals, SLAs, escalation logic and governance.
- Applied Field Service Management concepts across work order/service request management, workforce assignment, scheduling and dispatch, service execution, maintenance-related workflows, asset/service processes and operational performance visibility.
- Assessed current-state operational pain points and designed scalable future-state processes covering service catalogue, work/service requests, routing, approvals, escalation models and governance; extended service-management capability into workplace/Facilities from a standing start.
- Acted as functional liaison between operational stakeholders and technical delivery teams, clarifying requirements and supporting UAT, defect triage, business validation, deployment readiness, Agile releases, backlog prioritisation and acceptance criteria.
- Produced SOPs, process maps, training and knowledge content and provided post-go-live hypercare to support adoption across operational stakeholder groups.

## **HR & Legal Operations Consultant & Project Specialist - Paget Property | Jul 2017 - Jun 2021**

- Digitised HR, legal and compliance operations by replacing manual processes with structured service/workflow models across employee requests, legal enquiries and matter tracking.
- Partnered with business owners, employees and suppliers to capture operational needs and translate them into process maps, controls, approval workflows, SOPs and training materials.
- Built request forms, assignment/approval workflows and operational dashboards using SharePoint, Power Automate, Microsoft Forms, Excel and Teams, improving service transparency and management information.
- Defined documented intake, routing, escalation paths, governance controls and repeatable service processes, strengthening compliance, issue handling, visibility and adoption.

## **SERVICE MANAGEMENT CAPABILITIES**

**Work Order & Service Management:** Work/service request lifecycle | Categorisation & prioritisation | Assignment/ownership models | SLA & escalation management | Work-status and service-performance visibility

**Scheduling, Dispatch & Workforce:** Technician/resource assignment | Scheduling & dispatch workflows | Workforce capacity/prioritisation | Service routing/allocation | Field/mobile workforce enablement | Operational hand-offs

**Assets, Maintenance & Inventory:** Asset/service-management process design | Maintenance-related workflows | Parts/inventory process understanding | Service/asset data requirements | Operational controls & traceability

**Service Analytics & Performance:** Service KPIs/dashboards | Productivity analysis | SLA performance | Adoption reporting | Risk/exception reporting | Evidence-led continuous improvement

## **TECHNOLOGY TOOLS & PLATFORMS**

**Hands-on ServiceNow:** FSM | ITSM | CSM | HRSD | Employee Center | EmployeeWorks | Employee Slate

**FSM Platform Familiarity:** Salesforce Field Service | Microsoft Dynamics 365 Field Service | IFS FSM / Planning & Scheduling Optimisation | Oracle Field Service | ServiceMax

**Enterprise Tools:** Workday integration dependencies | Microsoft Power Automate | SharePoint | Microsoft Forms | Teams | Excel | Microsoft 365

**Delivery Methods:** Agile | Sprint planning | Backlog management | User stories | Acceptance criteria | Fit-gap assessment | UAT | Defect triage | Business validation | Deployment readiness | Hypercare

## **DELIVERY METHODS, GOVERNANCE & LEADERSHIP**

**Strategy & Design:** Current-state/as-is and future-state/to-be mapping | Operational diagnostics | Problem structuring | Service blueprinting | Target operating model | Journey mapping | Requirements validation | Value cases | Transformation roadmaps

**Governance & Quality:** RAID logs | Scope/risk/dependency management | Design reviews | Approval models | SLAs | Test plans | UAT planning/execution | Defect triage | Business validation | Go-live readiness

**Enablement & Leadership:** Senior client/C-suite engagement | Product Owner partnering | Cross-functional workshops | Executive presentations | Onshore/offshore team leadership | SOPs | Training | Knowledge content | Change adoption | Post-go-live hypercare

## **OPERATIONAL TRANSFORMATION PORTFOLIO**

**Field Service & Facilities:** Field Service Management | Workplace/Facilities service operations | Work orders/service requests | Assignment & routing | Scheduling & dispatch | SLAs | Escalation | Maintenance workflows | Asset/service management | Parts/inventory | Service analytics

**Enterprise Service Management:** ServiceNow-enabled workflows across HR, IT, Legal, Compliance, Finance & Audit | Service catalogue | Case/work management | Intake | Assignment | Approvals | Knowledge | Self-service | Reporting

**People Services:** Talent Acquisition | Performance Management | Rewards | Global Mobility | Payroll | Onboarding | HR service delivery | Employee requests | Case management | Knowledge & self-service

**Legal & Compliance:** Contract/legal request workflows | Approvals | Governance | Controls | Traceability | Risk management | Escalation paths | Compliance reporting

**UK Legal & Compliance Foundation:** LLB (Hons) plus 8+ years applying controls, approval hierarchies, escalation paths, governance, SOPs, traceability and reporting across operational service workflows.

## **EDUCATION**

**Education:** LLB (Hons), University of Central Lancashire, UK | Bachelor of Business Management with Law, Barkatullah University

**Certifications:** ServiceNow Certified Implementation Specialist - ITSM | ServiceNow Certified System Administrator | ITIL v4 Foundation | SAFe Agile Certification | ServiceNow Agentic AI Executive Certification
